

Webinar Handout - GenAI Careers

Key takeaways

GenAI roles split into: builders (engineers), adapters (analysts using AI), and PMs.

RAG, agents, and evaluation are the three skills employers screen for.

Recommended learning path

1. Python fundamentals 2. LLM APIs 3. LangChain basics 4. One end-to-end project

Q&A highlights

Q: Do I need a GPU? A: No - use hosted APIs to start.

Q: Is prompt engineering a career? A: It is a skill, not a career.
