AI recommends products,
services, actions, plans, etc.

↩ Flip

Persistent Session Cache

AI adapts to personal
preferences and habits

↩ Flip

One drive folder
structure mapped
to the user laptop

User types a phrase they
remember being discussed
in a previous course video to
find the exact timestamp or
scene.

User attempts to cross-reference
the old course file against the
repository to see what specific
slides, videos, or assets can be
salvaged versus what needs to be
replaced.

User puts in a
string say ML as
a example

User attempts to cross-reference
the old course file against the
repository to see what specific
slides, videos, or assets can be
salvaged versus what needs to be
replaced.
