

EXPLAINABILITY, TRANSPARENC

The Outdated Asset & Vector Drift Risk. Because vector databases guess meaning, they might pull up a brilliant slide template from 2017 that matches the concept perfectly but contains deprecated logos and dead links. Also, users need to know why a file was recommended.

PRIVACY

The Corporate Data Leak Risk. We are dealing with premium proprietary EdTech content and video files, uploading this 20 TB library to public cloud networks could compromise Codebasics' core intellectual property.

↶ Flip

DATA & SYSTEM SECURITY

The Local Performance Overload Risk. Forcing heavy file chunking, full-length audio transcriptions, and image OCR pipelines to compute directly on a creator's standard laptop could freeze their machine or crash their workflow.
